Whether industry-leading product-on-demand solutions, ground-breaking **DIGISOFT™** print technology, multi-vertical product line needs, comprehensive full-service program administration or all of the above, **IMAGINATE** delivers.

iMAGiNATE

- What You Get -

End-to-End Fulfillment at Scale

- 20+ Years of US-Based Manufacturing
  - Access to 10,000+ SKU's
- Empowering 250k digital businesses worldwide
- Bottomless throughput, producing 140k units per day

Learn More

Matchless Service

- Full Turnkey Implementation and Management Control
  - Integrated Customer Service
- Perennial market analysis and product trend optimization
- Partner support from start up to light speed

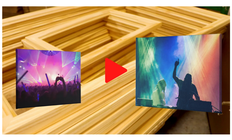
Exclusive DIGISOFT ™ Decoration Technology

- Increased print vibrancy
  - Sharper lines
  - Increased Durability
  - Superior Quality

Learn More

- Products -

From industry-leading vibrant canvas prints, vast array of apparel styles and high-demand accessories, **IMAGINATE** has you covered.



Custom Canvas

Our digital prints are achieved through a progressive printing process using ultraviolet curing technology, eliminating the use of toxic solvents while creating higher-quality, sharper, more durable prints for satin posters and gallery-wrapped canvas at unparalleled speed.

Canvas prints are hand-stretched on solid pine frames which are constructed in-house to provide the highest level of quality assurance during production. Poster and canvas prints will maintain their vibrancy for 95 years, making them some of the longest-standing products in our catalog.

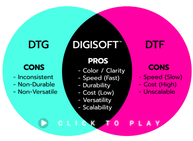
- DIGISOFT™ Apparel -

The World's Most Advanced On-Demand Apparel Prints

Equal parts DTG (Direct-to-Garment) & DTF (Direct-to-Film) print processes, DIGISOFT™ combines the best qualities of each without their limitations. The result is a ground-breaking product that's visually-stunning, impossibly durable, surprisingly versatile, & objectively superior to the competition — delivered at a speed today's world demands.

DIGISOFT™ prints are known for a sharp, consistent, true-to-color look with a soft, wearable feel, & impressive longevity on any fabric.

IMAGINATE partners enjoy exclusive access to DIGISOFT™ technology.



- DIGISOFT™ Performance Ratings -

DTG
Direct-to-Garment

Visual Appearance	6.11
Print Performance	5.83
Production Quality	3.33
Speed	8.80
Versatility	5.17
Volume Capability	6.83

While DTG printing is fast and inexpensive, quality is inconsistent at best. Factors like fabric material, thickness, and even color can greatly impact print quality and print-to-print consistency.

DIGISOFT™
Performance Printing Technology

Visual Appearance	8.67
Print Performance	8.67
Production Quality	8.50
Speed	9.00
Versatility	8.50
Volume Capability	8.67

DIGISOFT™ combines the speed and efficiency of DTG with the higher print quality of DTF, but without their limitations. DIGISOFT™ prints are fast, efficient, and affordable without compromising on quality.

DTF
Direct-to-Film

Visual Appearance	8.86
Print Performance	8.86
Production Quality	7.86
Speed	3.67
Versatility	7.67
Volume Capability	4.83

Direct-to-Film (DTF) printing greatly improved on print quality from DTF, but is slow, inefficient, and finishes with a heavier hand. DTF is capable of unique prints like foil transfers, but is far less suitable for scaling business.
